

SOAR TECHNOLOGY HELPS UNDERSTAFFED SECURITY TEAMS WORK MORE EFFICIENTLY

The biggest challenges for security teams

Not enough skilled security practitioners available

Lack of integration across tools for better SOC efficiency

Hard to manage multiple security tool vendors

SOAR helps lower mean time to respond, enabling security teams to focus on mission-critical tasks

Before SOAR Deployment

1-4 hours

After SOAR Deployment

30-60 minutes

SOAR helps understaffed security teams save more time per day/per analyst

89% of SOAR users overwhelmingly indicated that they saw **1-5 hours of time saved per day/per analyst**

Security teams want to adopt SOAR technology to...

reduce time on investigating alerts

69%

reduce time to respond to security events

61%

reduce cost of security operations

54%

SOAR helps lower SOC turnover among security practitioners

23 weeks

average time it takes to fill a Tier-3 security position

11%-30%

turnover rate for over half of security teams

74%

of SOAR users agree that SOAR lowers analyst turnover in their organizations

Enabling secure remote work during COVID-19 with SOAR

94%

reported that their SOAR platforms were either very or extremely valuable in enabling security teams to work remotely and coordinate security workflows.

54%

reported that their teams relied very extensively on SOAR platforms to respond faster to security incidents and alert triage during this time

Security doesn't need to be difficult. You just need the right tools.

SOAR platforms help security teams...

lower mean time to respond

save more time to attend to mission-critical tasks

reduce staff turnover rate in the SOC

fight against security threats while working from home

Security teams are using SOAR platforms to work smarter, not harder.

Learn how Splunk Phantom can help your organization stay ahead of threats with automation and orchestration.
